About Ameer Ali

Ameer Ali is a Cybersecurity Expert with 12+ years of industry experience, specializing in IT and OT/ICS Cybersecurity and Information Security Management Systems (ISMS). He has a proven track record in IT Service Management (ITSM), critical infrastructure security, and strategic technology planning, delivering secure, scalable, and cost-effective solutions across enterprise IT and industrial control environments. He brings specialized expertise in securing power generation and utility infrastructure across the UAE, Oman, and Saudi Arabia, bridging the gap between traditional IT security and operational technology resilience.

A distinguished speaker, trainer, and technology evangelist, he is recognized for delivering high-impact sessions across corporates, educational institutions, and industry forums on Cybersecurity, OT/ICS Security, Artificial Intelligence, social engineering, and digital risk awareness. He is a Cyber Crime Intervention Officer (National Security Database) and is committed to advancing a safer digital ecosystem through thought leadership, seminars, webinars, and strategic industry and social media engagement.

Beyond the stage, he is a seasoned expert in identifying critical vulnerabilities across complex systems, including high-risk environments such as medical devices and life-critical technologies. His presentations are known for being interactive, informative, and highly practical — delivered at schools & colleges, conferences, and corporate companies, fostering a culture of cyber awareness from students to professionals.

AREAS OF EXPERTISE

- Protecting personal and organizational data from cyber threats
- OT/ICS security assessments and vulnerability management for power generation and utility
- Bridging IT and OT security — network segmentation and industrial protocol risk management
- Assessing vulnerabilities in critical systems — from enterprise IT to OT/ICS and SCADA environments
- Cyber safety best practices for students, professionals & corporates
- Latest cybersecurity trends and risk mitigation strategies
- Understanding phishing, malware, and ransomware
